

Spaces to Work

Hire and Buy Offices

We have something for every purpose.

At Portabuild, we support Kiwi's who need practical, functional and comfortable building solutions for temporary and permanent use. We offer a wide range of standardised and customised options to suit different industry needs, from portable homes, classrooms, office spaces and toilets.

Our spaces are fully customisable, with the option to choose both interior and exterior fittings.

All buildings are constructed to NZ building standards and delivered on-site for immediate use. Our units are engineered for a 50-year lifespan. All of our buildings are code compliant and built to H1 insulation standards.

Our factory has a rigid QA process and highly trained staff with vast experience in various building trades and professions.

Since our offices are constructed off-site, they take minimal time to set up and can be delivered to you quickly. They're also warm, and comfortable, and enable you to provide a functional workspace to help get the job done.

Features

- A galvanised steel base
- Under floor insulation
- Insulated EPS panel for the walls and ceiling
- Double glazed joinery
- Power and data points
