

Spaces to Live

# The Creator 8.64m<sup>2</sup>

## Space to Create

At Portabuild we understand that New Zealanders crave the freedom and flexibility to live the way they want. So, we designed a range of cost-effective small home solutions to help more people just do that.

Our buildings meet Healthy Home standards and are engineered for a 50-year lifespan. Our off-site build process means we can ensure quick manufacturing (often in just 5 working days!\*)

The Creator is a flexible compact space with thermally broken double glazing and quality insulation. Perfect as a small home office or personal activity space.

## Specifications
