

Spaces to Live

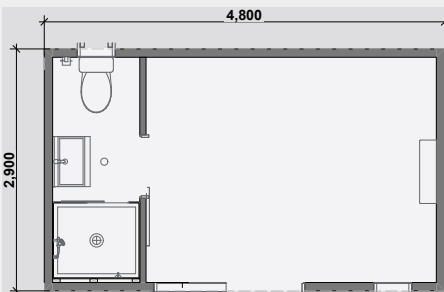

The Expander 13.92m²

Space to Expand

At Portabuild we understand that New Zealanders crave the freedom and flexibility to live the way they want. So, we designed a range of cost-effective small home solutions to help more people just do that.

Our buildings meet Healthy Home standards and are engineered for a 50-year lifespan. Our off-site build process means we can ensure quick manufacturing (often in just 5 working days!*).

The Expander is a flexible space that can serve a range of different purposes, from overflow accommodation for teenagers to a spacious home office.
