

The Relaxer 33.6m²

Space to Relax

At Portabuild we understand that New Zealanders crave the freedom and flexibility to live the way they want. So, we designed a range of cost-effective small home solutions to help more people just do that.

Our buildings meet Healthy Home standards and are engineered for a 50-year lifespan. Our off-site build process means we can ensure quick manufacturing (often in just 5 working days!)*.

The Aspirer is a self contained one bedroom unit, excellent choice for holiday homes, Airbnb, downsizing, or even as farmworker accommodation.
